

Eye Health Evaluation

Vision threatening diseases such as glaucoma, macular degeneration, and diabetic retinopathy often have no outward signs or symptoms in the early stages. So our practice has begun using state of the art technology to assess the health of your eyes. At EyeRis Vision, we provide different options for you to choose from in order for our doctors to best evaluate your eye health.

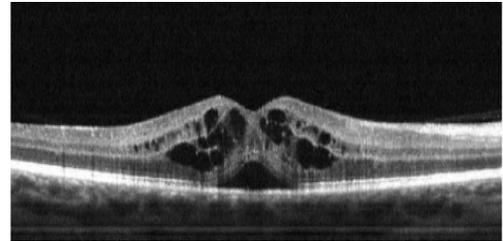

Please select the following:

- iWellness RETINAL SCAN: NEW technology!**
 - A quick, non-invasive scan of your eye similar to an **MRI or X-ray**
 - The scan shows the health of the **deeper layers of the retina**, which cannot be seen with regular equipment, allowing us to monitor for changes over time, and for earlier detection of problems that may affect your vision such as glaucoma, etc.
 - **Additional \$39*. **Not covered by vision benefit plans***

HEALTHY RETINA

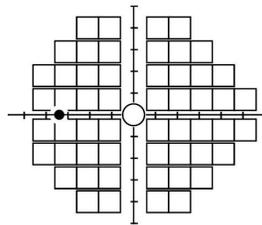

UNHEALTHY RETINA

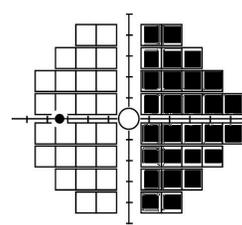

- iWellness RETINAL SCAN + VISUAL FIELD SCREENING: BEST recommended package!**
 - Visual Field screener is a computerized analyzer test that checks your central and peripheral field of vision. This screener tool is able to detect large retinal tears, glaucoma, brain tumors etc.
 - **Additional \$50*. **Not covered by vision benefit plans***

NORMAL VISUAL FIELD

ABNORMAL VISUAL FIELD

If you are uncertain about which option to select, our staff/doctor will explain and help you select the best option for you. During your visit, dilation drops could be instilled when our doctor deemed necessary. Your vision will be blurry at near for approximately 5-6 hours and more sensitive to light than normal. Your office visit could go from routine to medical office visit based on the findings. I have read and reviewed this form.
